1. About Apparel The Hub

Apparel The Hub is an apparel manufacturing partner in Pakistan, supporting fashion brands, retailers, wholesalers and organisations with custom clothing development, private-label apparel and bulk garment production.

From product ideas and technical packs to sampling, fabric sourcing, stitching, finishing and packing, we help buyers plan their garment requirements around their designs, specifications and brand identity.

Our product range covers knitwear, woven garments, outerwear, layering, uniforms, workwear, kidswear and teamwear. Depending on the product and project requirements, we can also support sourcing and production coordination through suitable manufacturing partners.

Our approach focuses on clear communication, specification-based development and attention to detail throughout the production process.

Our commitment: Every garment should reflect the agreed requirements for fit, fabric, construction, branding and finishing.

Our Core Services

Service	Description
Custom Apparel Manufacturing	Garments developed around your design, fit and specifications.
Private Label Clothing	Custom garments with your brand labels, tags and packaging.
OEM Manufacturing	Production based on buyer-provided designs and technical requirements, subject to project scope.
Garment Sampling	Sample development and review before bulk production.
Fabric Sourcing	Assistance in identifying suitable fabrics, GSM, colours and materials.
Custom Branding	Printing, embroidery, labels and other branding options where available.
Quality Checking	Checks against agreed measurements, construction and finishing requirements.
Packing & Shipment Preparation	Garment packing and order preparation according to buyer instructions.
Sourcing Coordination	Support with suitable partner suppliers for agreed product categories where required.

Indicative Production Information

Production Detail	General Guidance
Minimum Order Quantity (MOQ)	From 300 pieces per colour for selected products
Sample Lead Time	Approximately 7–10 working days for selected styles
Bulk Production Lead Time	Approximately 30–45 days after approvals and material confirmation
Production Capacity	Up to 1,000 pieces per day for selected production programmes
Manufacturing Base	Faisalabad, Pakistan
Shipping	Arrangements depend on destination, order and freight requirements

Important: These figures are indicative, not guaranteed for every product. Final MOQ, sample timing, capacity, pricing and delivery schedule must be confirmed for each order before the buyer commits.

2. Product Range at a Glance

Apparel The Hub supports a variety of apparel categories for fashion collections, retail programmes, uniforms and workwear projects.

Product Category	Product Types	Suitable For
Knitwear	T-shirts, polos, hoodies, sweatshirts, joggers, shorts and tracksuits	Fashion brands, streetwear, lifestyle and casualwear
Woven Shirts	Casual shirts, Cuban collar shirts, band collar shirts, printed shirts and overshirts	Retail, resortwear, smart-casual and lifestyle brands
Woven Trousers & Bottoms	Linen trousers, dress trousers, chinos, cargo trousers and woven shorts	Fashion labels, retailers, uniforms and workwear
Outerwear & Jackets	Windbreakers, track jackets, bomber jackets, lightweight shells and selected padded styles	Fashion, sportswear, lifestyle and corporate programmes
Jumpers & Layering	Crewnecks, half-zips, full-zips, cardigans and sweater vests	Fashion, school and corporate clothing
Uniforms	School, corporate, hospitality, retail and team uniforms	Institutions and organisations
Workwear	Work shirts, cargo trousers, jackets, polos, sweatshirts, gilets and aprons	Staff teams, service businesses and selected industrial programmes
Kidswear & Teamwear	Kids' basics, tracksuits, jerseys, training sets and coordinated garments	Kidswear brands, teams and organisations
Fabric & Branding Options	Fabric sourcing, labels, hang tags, printing, embroidery and packing	Private-label and custom apparel projects

Please note: Product availability depends on the design, fabric, quantity, required finish and suitable production route.

3. Knitwear Collection

Custom Knitwear for Private-Label and Fashion Brands

Our knitwear range includes everyday essentials, casualwear and coordinated garments developed around buyer specifications. Styles, fabric weights, colours and branding can be discussed during product development.

Product	Description	Possible Options
T-Shirts	Everyday and fashion T-shirts for retail, casualwear and promotional collections.	Regular, relaxed, oversized, heavyweight and long-sleeve styles
Polo Shirts	Classic and contemporary polos for casual, retail and uniform programmes.	Piqué or jersey fabrics, custom collars, cuffs, buttons and embroidery
Hoodies	Pullover and zip-up styles for streetwear, lifestyle and casual collections.	French terry, fleece, custom rib, drawcords, print and embroidery
Sweatshirts	Crewneck and relaxed sweatshirts for everyday and seasonal collections.	French terry, fleece, rib details, screen printing and embroidery
Joggers	Knit bottoms designed for coordinated sets, loungewear and casual collections.	Tapered, relaxed, straight-leg and open-hem options
Shorts	Comfortable knit shorts for casualwear and coordinated sets.	Jersey, French terry, elastic waistbands, drawcords and pockets
Tracksuits	Matching tops and bottoms for casual, team and lifestyle programmes.	Coordinated colours, panels, piping, zips and branding
Kidswear	Knit garments developed around the buyer's size chart and product requirements.	T-shirts, hoodies, sweatshirts, joggers, shorts and sets

Common Knit Fabric Options

- 100% cotton
- CVC and cotton/polyester blends
- Single jersey
- Piqué
- French terry
- Fleece
- Interlock and other suitable knit constructions

Please note: Fabric composition, GSM, colour availability and finishing must be confirmed for each style.

4. Woven Shirts Collection

Custom Woven Shirts for Retail, Resort and Smart-Casual Collections

Apparel The Hub supports the development of woven shirt styles based on the buyer's design, fit, fabric and branding requirements.

Shirt Style	Description	Development Options
Cuban / Revere Collar Shirts	Relaxed open-collar shirts for summer, resort and contemporary casual collections.	Short or long sleeves, plain or printed fabrics, cotton, linen blends or suitable alternatives
Casual Collared Shirts	Button-front shirts for everyday fashion and retail ranges.	Regular, slim or relaxed fit, chest pockets, button-down collars and sleeve options
Band Collar Shirts	Minimal stand-collar shirts for modern casualwear.	Cotton, linen blends, poplin and custom finishing
Printed Shirts	Shirts developed around buyer artwork or selected print designs.	All-over print or placement print, subject to fabric and print-method suitability
Linen / Linen-Blend Shirts	Textured, lightweight styles for warm-weather collections.	Pure linen or suitable blends, relaxed fits and different sleeve lengths
Oxford Shirts	Structured shirts for smart-casual, retail and selected uniform programmes.	Oxford cloth, button-down collars, chest pockets and embroidery
Overshirts	Woven layering shirts for fashion and utility-inspired collections.	Twill, canvas or other suitable heavier fabrics, patch pockets and buttons or snaps
Custom Woven Shirts	Buyer-specific shirt development based on a tech pack or reference garment.	Custom collar, placket, cuff, fit, pocket, trim and packaging requirements

Woven Shirt Development

Buyer Requirement	Details to Confirm
Fabric	Composition, weight, texture and intended use
Fit	Regular, slim, relaxed or oversized
Construction	Collar, cuff, placket, pockets and stitching details
Branding	Labels, embroidery, printing, buttons and other trims
Finishing	Pressing, folding, packing and presentation

Please note: Material availability and production feasibility are confirmed before sampling or bulk production.

5. Woven Trousers & Bottoms

Custom Woven Bottoms for Fashion, Retail and Uniform Programmes

Our woven bottoms category covers a range of casual, tailored and utility-inspired styles. Final construction and fit are developed according to the buyer's approved specifications.

Product	Description	Possible Options
Linen Trousers	Lightweight-looking styles for summer, resort and relaxed collections.	Flat front, elastic waist, drawcord, tapered, straight or relaxed fit
Dress Trousers	Smart woven trousers for formal and contemporary retail collections.	Regular, slim, straight-leg or pleated designs
Loose-Fit Dress Trousers	Relaxed tailoring with a wider silhouette.	Wide leg, pleats, rise and drape options
Relaxed Trousers	Casual woven bottoms designed around a comfortable fit.	Elastic waist, drawcord, straight leg or wide leg
Chinos	Smart-casual trousers for retail, corporate and selected uniform programmes.	Cotton twill or suitable stretch blends, regular, slim or relaxed fits
Cargo Trousers	Utility-inspired trousers with practical pocket arrangements.	Cargo pockets, relaxed fit, adjustable hems and specified details
Woven Shorts	Casual, linen-style, chino and utility-inspired shorts.	Elastic waist, drawcord, flat front, pockets and tailored details
Uniform Trousers	Coordinated trousers developed for organisations and repeat-order programmes.	Size assortments, agreed colours and consistent specifications

What Can Be Customised?

- Fabric composition and weight
- Waistband and fastening
- Fit, rise and leg shape
- Pocket design and placement
- Stitching and finishing details
- Labels, tags and packing

6. Outerwear & Jackets

Jacket Manufacturing and Development Options

Outerwear requirements can vary significantly by material, lining, construction and intended use. Each style should be reviewed individually to confirm its suitable production route.

Product	Description	Possible Options
Polyester Jackets	Lightweight or lined jackets developed to the approved specification.	Full zip, collar or hood, lining and pocket options
Windbreakers	Lightweight outer layers for casual, sports and lifestyle collections.	Hooded or collared styles, zip fastening, elasticated finishing and colour blocking
Track Jackets	Sports-inspired or lifestyle zip jackets.	Stand collar, panels, piping and suitable branding
Bomber Jackets	Fashion jackets with a classic ribbed collar, cuffs and hem.	Zip front, shell fabric, lining and private-label details
Coach Jackets	Lightweight outer layers for streetwear and casual collections.	Collar, snap or zip fastening, print and embroidery where suitable
Lightweight Shell Jackets	Simple shell styles developed around confirmed material requirements.	Hood or collar, pockets, zips and lining options
Padded / Quilted Jackets	Selected insulated or quilted garments where a suitable production route is available.	Quilting, padding, hood or collar and gilet variations
Fleece Jackets & Gilets	Warm layering garments for casual, corporate and selected workwear programmes.	Full zip, half zip, stand collar and pockets

Performance and compliance note: Claims such as waterproof, windproof, breathable, thermal, flame-resistant or protective should only be made where the exact garment has suitable supporting specifications or test documentation. No certification is implied by listing a product category.

7. Jumpers, Cardigans & Layering

Layering Apparel for Fashion, School and Corporate Buyers

This category includes knitwear and fleece-based layering styles. Availability depends on the yarn, fabric, construction, quantity and approved production route.

Product	Description	Possible Options
Crewneck Jumpers	Classic or relaxed layering garments for fashion and uniform collections.	Fine or medium gauge, rib details and embroidery or badges
Half-Zip Jumpers	Layering styles with a stand collar and partial zip fastening.	Quarter or half zip, ribbed cuffs and hem, custom colours
Full-Zip Jumpers	Zip-through garments for casual, corporate or school programmes.	Full zip, pockets, collar options and branding
Cardigans	Button-front or zip cardigans for fashion and uniform collections.	V-neck, crewneck, buttons, zip and badge or embroidery
Knitted Jerseys / Sweaters	Crewneck or V-neck styles for fashion, school and team programmes.	Stripes, colour blocking, logos and classic or relaxed fits
Sweater Vests	Sleeveless layering garments for fashion and uniforms.	V-neck or crewneck, rib details and badges
Fleece Half-Zips	Casual and practical fleece layering garments.	Half zip, stand collar, pockets and embroidery
Fleece Full-Zips	Zip-up fleece garments for selected uniform, lifestyle and workwear programmes.	Full zip, pockets, collar options and branding

Please note: Knitted sweater construction may require a different manufacturing route from cut-and-sew knitwear. Feasibility and sourcing are confirmed according to the project.

8. Uniform Clothing Programmes

Custom Uniforms for Organisations and Institutions

Uniform projects require consistency in colours, sizing, branding and construction. Apparel The Hub can review uniform requirements and discuss a suitable production approach for the approved garment range.

Uniform Category	Garments	Key Requirements
School Uniforms	Polos, shirts, trousers, jumpers, cardigans, sweatshirts and tracksuits	School colours, badges, size ranges and repeat orders
Corporate Uniforms	Polos, shirts, trousers, jackets, knitwear and gilets	Company branding, coordinated colours and size assortments
Hospitality Uniforms	Shirts, polos, trousers, aprons and jackets	Practical design, easy-care materials and branding
Retail / Service Uniforms	T-shirts, polos, shirts, trousers and sweatshirts	Staff comfort, consistent colours and repeatable specifications
Sports / Team Uniforms	Jerseys, shorts, tracksuits and training tops	Team colours, logos, names and numbers where supported
Healthcare / Staffwear	Selected staff garments according to confirmed requirements	Functional pockets, colour coding and suitable materials
Security / Institutional Uniforms	Shirts, trousers, polos, jackets and outer layers	Approved design, badge placement, sizing and construction
Custom Uniform Programmes	Coordinated garments for a particular organisation	Garment mix, size matrix, branding and replenishment planning

Information to Share for a Uniform Quote

Requirement	Details
Organisation	School, company, hotel, team or other institution
Garment Range	Types and quantities of garments required
Colours & Branding	Colour references, logos, badges and embroidery artwork
Sizing	Size range and approximate quantity per size
Delivery	Required delivery date and destination
Repeat Orders	Expected frequency and consistency requirements

Please note: All uniform orders are subject to product review, material availability and confirmation of production capability.

9. Workwear Clothing Programmes

Practical Apparel for Staff, Service and Workplace Teams

Workwear should be developed around the garment's intended use, required construction and buyer specifications. Special safety or protective properties must be verified separately.

Product	Description	Possible Options
Work Shirts	Long- or short-sleeve shirts for staff and service programmes.	Pockets, reinforced details, suitable woven fabrics and embroidery
Work / Cargo Trousers	Practical trousers with functional pocket layouts.	Cargo pockets, straight or relaxed fit and specified reinforcement
Work Jackets	Outer layers for workplace and staff clothing programmes.	Zip or snap fastening, pockets, lined or unlined construction
Coveralls / Boilersuits	One-piece work garments where a suitable production route is confirmed.	Pocket layouts, closures, size range and branding
Work Polos & T-Shirts	Branded tops for service, warehouse and field teams.	Suitable knit fabrics, printing and embroidery
Work Sweatshirts & Hoodies	Comfortable layers for cooler environments.	Crewneck or hooded styles, zip options and custom branding
Gilets / Utility Vests	Layering garments with practical pocket options.	Bodywarmer styles, pockets and branding
Aprons	Waist or bib aprons for hospitality, retail and workshop use.	Straps, pockets, logo placement and suitable fabrics

Compliance note: High-visibility clothing, flame-resistant garments, anti-static apparel, PPE and other regulated products should only be supplied where the required specifications, production capability and documentation are confirmed. Product listing alone does not indicate certification.

10. Kidswear & Teamwear

Coordinated Apparel for Kidswear Brands and Teams

Kidswear and teamwear can be developed around the buyer's size chart, colour requirements, design and branding. Product suitability, trims and construction should be reviewed before sampling.

Product	Description	Possible Options
Kids' T-Shirts	Everyday tops for casual and coordinated collections.	Short or long sleeves, custom colours and branding
Kids' Hoodies & Sweatshirts	Comfortable layering garments.	Pullover or zip styles, rib details and print or embroidery
Kids' Joggers & Shorts	Casual bottoms for everyday wear and coordinated sets.	Elastic waist, drawcord where appropriate, pockets and fit options
Kids' Tracksuits	Matching tops and bottoms.	Coordinated colours, panels and branding
Team Jerseys	Team garments developed around agreed designs.	Team colours, logos, names and numbers where supported
Training Sets	Coordinated garments for training and team activities.	Tops, shorts, tracksuit bottoms and matching details

Please note: All sizes, trims, labelling and other product details must be confirmed against the intended market and buyer requirements.

11. Buying House & Sourcing Support

Apparel Sourcing Coordination in Pakistan

For projects that fall outside the most suitable direct manufacturing route, Apparel The Hub may assist with sourcing and coordination through appropriate partner suppliers, subject to availability and project requirements.

This service is intended for buyers who need support with supplier identification, sample follow-up, production coordination and shipment preparation across agreed apparel categories.

Service	What It May Include
Buyer Brief Review	Reviewing product references, tech packs, target quality, quantity, target price and delivery window
Supplier / Factory Matching	Identifying a potentially suitable manufacturing or sourcing route
Fabric & Trim Sourcing	Coordinating fabrics, zips, buttons, labels, packaging and other components
Costing & Quotation	Requesting and reviewing commercial quotations against the agreed brief
Sample Coordination	Managing sample requests, revisions and buyer feedback
Production Follow-Up	Tracking agreed milestones and communicating potential issues
Quality Coordination	Arranging agreed quality checks where available
Packing Review	Checking specified labels, barcodes, size ratios, folding and carton markings
Consolidation Support	Coordinating multiple categories or suppliers where practical
Shipment Preparation	Coordinating packing requirements and handover information for shipping

Transparency: Products made through partner factories are represented as sourced or coordinated — not manufactured in-house — unless in-house production is factually accurate.

12. Fabric & Material Options

Choose Fabrics According to Product, Season and Target Price

Fabric selection influences garment appearance, comfort, construction, durability and cost. The options below are common material directions for apparel development; final composition and availability must be confirmed for each order.

Fabric / Material	Typical Characteristics	Common Applications
100% Cotton Knits	Natural fibre with a soft hand feel and breathability, depending on construction	T-shirts, casual tops and selected kidswear
CVC	Cotton-rich blend with polyester	T-shirts, polos and casualwear
Cotton / Polyester	Blend selected according to required performance and price	Casual garments, uniforms and selected workwear
Single Jersey	Lightweight knitted construction	T-shirts and casual tops
Piqué	Textured knit construction	Polo shirts and selected uniform tops
French Terry	Knit fabric with looped backing	Hoodies, sweatshirts and joggers
Fleece	Brushed or fleece-based construction, depending on type	Hoodies, sweatshirts and fleece jackets
Poplin	Lightweight woven fabric	Shirts and selected uniforms
Oxford Cloth	Textured woven shirting fabric	Casual shirts and selected uniform programmes
Twill	Diagonal weave, available in different weights and compositions	Chinos, cargo trousers, overshirts and workwear
Linen / Linen Blends	Textured materials commonly used for warm-weather clothing	Summer shirts and trousers
Viscose / Rayon Wovens	Drapey woven options depending on composition and construction	Printed shirts and resortwear
Suiting / TR-Type Blends	Woven materials used for structured styles	Dress trousers and selected corporate garments
Polyester Woven Shells	Woven shell fabrics in confirmed compositions	Jackets, windbreakers and track jackets
Canvas / Heavier Wovens	More substantial woven materials	Overshirts and selected utility garments

Fabric Details to Confirm

Specification	Why It Matters
Composition	Identifies fibre content
GSM / Weight	Helps define fabric weight and intended use
Colour	Must be agreed against the buyer's reference
Shrinkage	Should be checked where relevant to the product
Colourfastness	Requirements depend on the garment and intended use
Finish	Influences appearance and handling
Availability	Depends on sourcing, quantity and supplier confirmation

Please note: The fabrics listed are development and sourcing options, not a guarantee of continuous stock. Any performance or test-related claims must be supported by appropriate evidence.

13. OEM, Private Label & Customisation

Your Design. Your Brand. Your Labels. Your Packaging.

Apparel The Hub supports customisation based on buyer-provided designs, technical packs, reference garments and branding requirements. The available options depend on the garment, fabric, order quantity and selected production route.

Customisation Area	Possible Options
Design & Fit	Tech-pack-based development, reference samples, regular, slim, relaxed or oversized fits
Colours	Buyer colour references or Pantone direction, subject to material availability
Construction	Collars, cuffs, ribs, plackets, pockets, panels, waistbands, linings and closures
Printing	Screen printing and other suitable methods where available and confirmed
Embroidery	Logo embroidery and other suitable embroidery options
Labels	Woven labels, printed labels, neck labels, size labels and care labels
Retail Details	Hang tags, barcode labels, stickers and ticketing
Packaging	Folding, polybags, size assortments, carton markings and other agreed packing requirements
Uniform Details	Badges, department colours, pocket layouts and repeat-order specifications
Finishing	Thread trimming, pressing and other agreed finishing requirements

What to Provide

- Design, sketch, tech pack or reference garment
- Logo and artwork files
- Fabric composition or GSM target, if known
- Colour references and size chart
- Print, embroidery and placement instructions
- Labels, hang tags and packaging requirements
- Estimated quantity and destination

Have a design or tech pack? Share your requirements to discuss sampling, costing and development options.

14. Quality Control — Every Stitch Matters

Quality Starts with Clear Specifications

Quality requirements should be agreed before production begins. Depending on the project, checks may be arranged at relevant stages to compare garments with the approved sample, measurements and order specifications.

Quality Checkpoint	What Is Reviewed
Stitching & Construction	Seam workmanship, stitch consistency, loose threads and specified construction details
Measurements	Key points of measurement compared with the approved size chart and tolerances
Fabric & Material	Visible faults, holes, stains, shade variation and surface issues
Colour Consistency	Garment panels and material lots compared with the approved reference where applicable
Printing & Embroidery	Artwork, placement, appearance and workmanship
Trims & Components	Zips, buttons, snaps, labels, drawcords, elastic, rib and other specified components
Uniform Details	Badge placement, pocket layout, colour coding and specified functional features
Finishing	Thread trimming, pressing, cleanliness, shape and presentation
Packing & Assortment	Quantities, size and colour ratios, labels, folding, bags and carton markings
Final Review	Agreed checklist and order requirements before shipment preparation

Please note: The scope and method of inspection should be agreed for each order. Checks are not described as independent inspection, laboratory testing or certification unless that service has actually been carried out by a qualified provider.

15. How We Work

A Clear Process from Design to Finished Garment

Our process is designed to help buyers clarify requirements, review samples and agree production details before a bulk order proceeds.

Direct Manufacturing Journey

Step	Stage	Description
1	Share Requirements	Send your design, tech pack, sketch or reference garment.
2	Review Fabric & Construction	Discuss fabric, GSM, trims, fit, branding and finishing.
3	Costing & Quotation	Review the estimated cost according to the agreed specifications.
4	Sample Development	Develop a sample where required and feasible.
5	Sample Approval	Review fit, measurements, material, colour, construction and branding.
6	Bulk Production	Begin production after the required approvals and material confirmation.
7	Quality Checking	Review agreed product and workmanship requirements.
8	Packing & Shipment Preparation	Prepare the approved garments according to the packing instructions and agreed shipping arrangements.

Buying House / Sourcing Journey

Step	Stage	Description
1	Send a Sourcing Brief	Share product requirements, quantity, target price and delivery destination.
2	Review Suitable Routes	Identify potential suppliers or manufacturing options.
3	Costing & Sample Coordination	Request quotations and coordinate sample requirements where available.
4	Buyer Approval	Confirm the selected option and agreed specifications.
5	Production Follow-Up	Coordinate updates according to the agreed scope.
6	Quality & Packing Coordination	Arrange agreed checks and review packing requirements where available.
7	Shipment Coordination	Prepare the required order information for the agreed shipping process.

What to Include in Your Quotation Request

Information	Examples
Product	T-shirt, hoodie, woven shirt, trousers, jacket or uniform
Design	Tech pack, sketch, image or reference garment
Quantity	Total pieces and quantity per colour or size
Fabric	Composition, GSM or material preference, if known
Colour & Size	Colour references and size range
Branding	Print, embroidery, labels, tags and artwork

Information	Examples
Packaging	Individual packing, size stickers, barcode or carton requirements
Target Price	Budget or target price, if available
Destination	Country and delivery location
Timeline	Required sample date and target delivery window

Pricing note: Each quotation depends on the garment specification, material, quantity, trims, decoration, packaging, production or sourcing route and destination requirements. A final price and timeline are confirmed only after the details have been reviewed.

16. Start Your Next Collection

Have a Clothing Idea? Let's Turn It Into a Garment.

Whether you are launching a new fashion label, expanding a retail collection, developing uniforms or sourcing multiple apparel categories, Apparel The Hub can review your requirements and discuss suitable next steps.

Share your design, tech pack, reference garment or sourcing brief to begin the conversation.

Manufacturing Enquiries

For knitwear, woven garments, outerwear, private-label apparel, uniforms and workwear.

Please include: Product • Quantity • Fabric • Branding • Delivery Requirements

Sourcing Enquiries

For sourcing coordination, supplier options and multi-category apparel projects, subject to availability.

Please include: Product Brief • Target Price • Quality Requirements • Quantity • Destination
